### **REASONS FOR ALLOWANCE**

The applicant's response filed July 16, 2004 to the Office action has been entered. Claims 1-21 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 1-21, no prior art has been found teaching or suggesting the method for the identification and isolation of a genetic sequence from an organism in which the method applies the first oligonucleotide primer which selectively hybridizes under stringent hybridization condition to the adapter sequence attached to a mutant DNA fragments and the second oligonucleotide primer which selectively hybridizes under stringent hybridization conditions to the transposable element which is flanking the genetic sequence associated with the mutant phenotype.

The closest prior art is the reference of Lindermann et al. (5,958,738, issued 9/1999) in view of Kindiger et al. (5,710,367, issued 1/1998). Neither Lindemann et al. nor Kindiger et al. teach or suggest amplification employing a first oligonucleotide primer which selectively hybridizes under stringent hybridization conditions to the adapter, and a second oligonucleotide primer which selectively hybridizes under stringent hybridization conditions to the transposable element or transgene sequence as required by step (e) of claim 1 or by step (d) of claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
